

Great value waste collections

Get more value with Waste King

Waste King are the only waste company in the UK to have a 6 ton capacity truck that holds 35 cubic yards, saving time as we can take more waste meaning we make fewer trips. Waste King are also the only Man and Van company in the UK to have a Waste transfer site. This saves our customers money as we tip internally. Further reasons for choosing us:

- Trucks to suit your needs; 18 / 24 / 35 cubic yard trucks
- Only charge by the cubic yard
- Tail lifts for heavy / large items
- Specialist Designed Waste trucks to clear rubbish
- Registered licensed waste carrier CBDU93920
- Fully secure Waste trucks so rubbish does not fall out!
- Professional uniformed 2 man teams - we even sweep up!

"Always great service, people very nice and friendly, will always leave the completed jobs neat and tidy. Nothing is to much trouble."

Paul Hunt

Some other Waste Companies use small capacity trucks to hold rubbish only 8-12 cubic yards, which have a low weight capacity without tail lifts and some trucks even have open tops that allow waste to fall onto the road.

Some of our competitors use vans which are not designed for waste and do not tip which increases the cost and time. Its hard to place large items in the vehicles as the space is not like a box, meaning you are paying more for their time to load up the van.

97%

of all your waste is re-cycled at our OWN waste transfer station reducing waste to landfill
